

Sovereignty Requires Open

OGC iDAYS 2025 // December 9, 2025

Albi Wiedersberg, VP Product at Overture

What is Overture Maps?

Why Overture?

Founded in 2022 by AWS, Meta, Microsoft, TomTom to create
reliable, easy-to-use, and interoperable open map data

What's Included?

Map data: Best open data sources
(crowdsourced, gov, AI Generated, ...)

Quality & Validation: Conflated & validated to
achieve market grade quality

ID system: Tied to IDs for interoperability (e.g.
append with proprietary attributes)

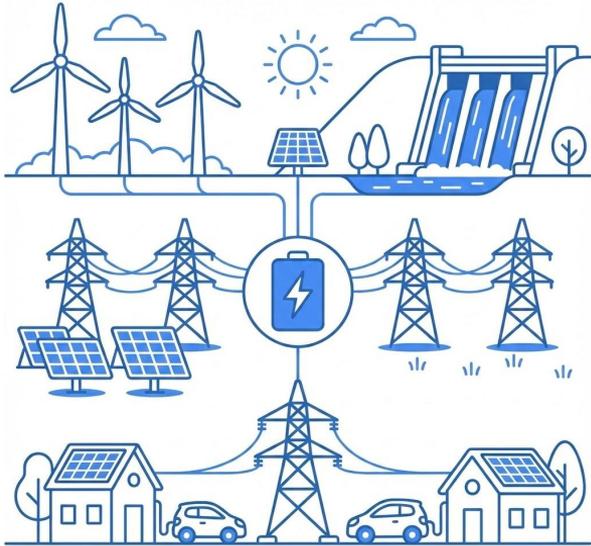

Built For

Public sector & NMAs looking for common base
layer for asset alignment & AI grounding

Developers building geospatial products with
“analysis ready” cloud-native data

Data providers optimizing their user experience
and reach in a shared ecosystem

Public Utility, Not Private Walled Garden

Governance

Linux Foundation

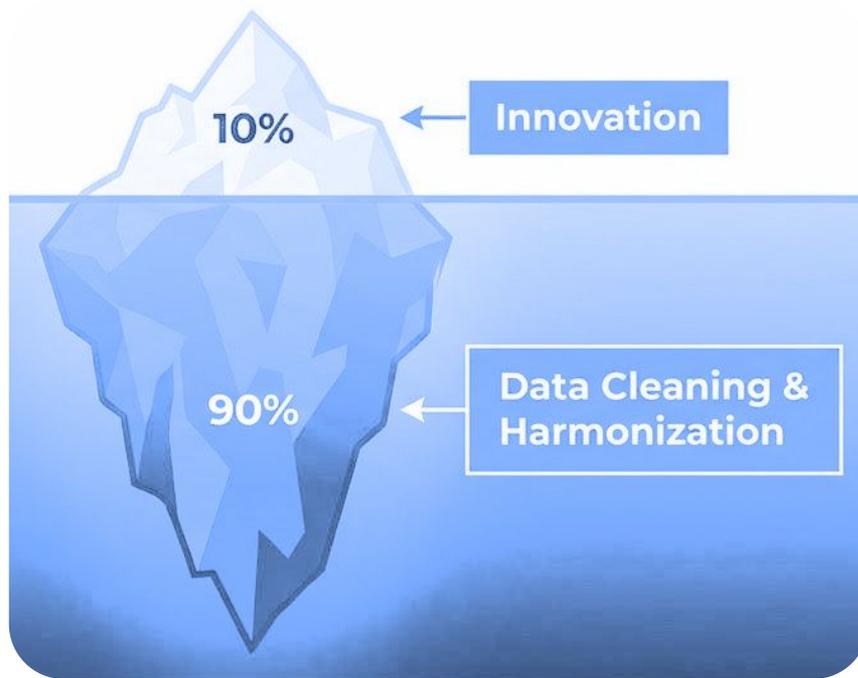

IP & Data

Open

Accelerant of the Open Data Revolution

– AGI Foresight Report 2030

The Hidden Cost

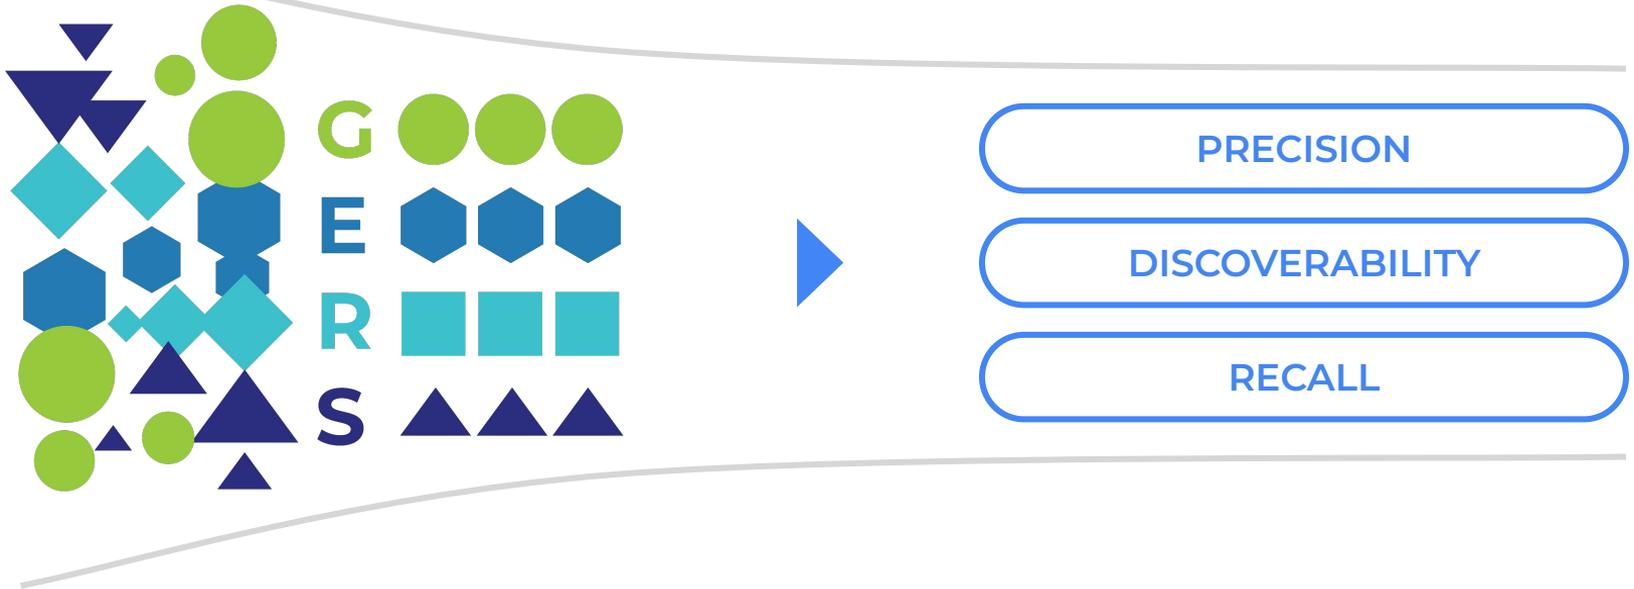

Engineering Gap

Local municipalities \neq
Data Engineers

Conflation Tax

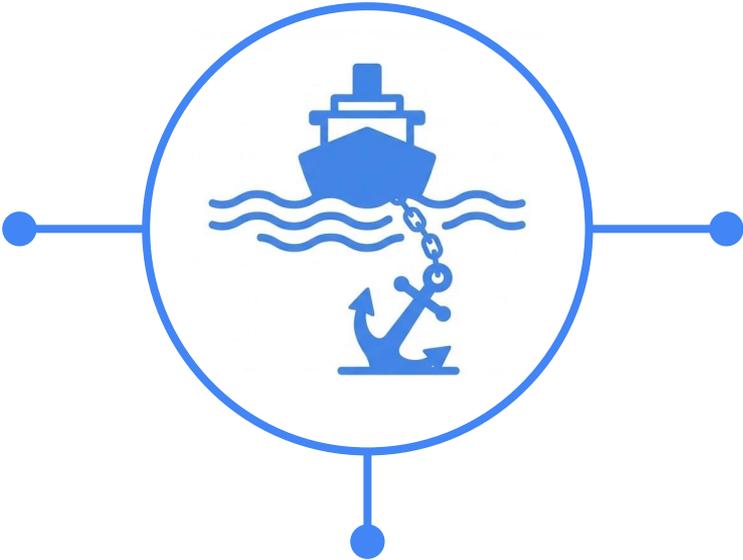

90% Data Cleaning vs.
10% Innovation

Organizing Upstream

Stability & Grounding

Conflation w/
ML + Human QA

Collaborative
Signals

Cross-theme
Linkage

Conclusion

Open

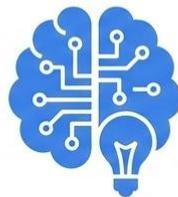

Collaborative

Interoperable

Federated

AI Ready

Sovereign
