---

<b>Title:</b>	*Schemas should use full URL to import from another namespace
<b>Source:</b>	*JRC (GIGAS)
<b>Work item code:</b>	
<b>Category:</b>	* A (corresponds to a correction in an earlier release)

---

<b>Reason for change:</b>	* OGC's 'Policies Related to OGC Standards' clause 15 directs that within OGC XML Schema documents, the @schemaLocation value on elements should be a full URL, not a relative path.
<b>Summary of change:</b>	* Update schema documents in OGC schema repository to conform with policy (335 places detected).
<b>Consequences if not approved:</b>	Continued confusion about the correct location of OGC schemas, particularly when people have made local caches.

---

<b>Clauses affected:</b>	* (Related to Clause 15 of 06-135r7)
<b>Additional Documents affected:</b>	Many schema documents in OGC repo.

**Supporting Documentation:** 

Attached text file details offending elements, with suggested fixes.
