Title:	*Redefinition of GetCapabilities response document element
Source:	*Lorenzo Bigagli
Work item code:	
Category:	* F (Critical correction)
Reason for change:	* GetCapabilities response element is mandated to "Capabilities" in the "http://www.opengis.net/cat/wrs/1.0" namespace. This is in contrast with the baseline specification, where the namespace is set to "http://www.opengis.net/cat/csw/2.0.2". Clients unaware/unsupportive of the ebRIM AP cannot handle the response type
Summary of change:	* Allow for a mechanism of selecting between the baseline and the ebRIM AP response type. Overloading the mandatory "service" parameter is assumed in the EO EP, as follows (the following paragraph should be added to

	§8.2 of 07-110r4). The value of the mandatory "service" parameter may be 'CSW' or 'CSW-ebRIM'. In the former case, the server should respond as defined in the baseline CSW specification. In the latter case, the server should respond as defined in the following section.
Consequences if not approved: ⓘ	Interoperability issue between ebRIM AP compliant services and generic CSW clients
Clauses affected: ⓘ	* §8.2
Additional Documents affected: ⓘ	06-131r6_EO_Products_Extension_Package_for_ebRIM_(v0.2.5) contains the same paragraph (see §9.2.1.1)
