<b>Title:</b>	*The numberReturned parameter should be able to have the value "unknown".
<b>Source:</b>	*SAA Pilot
<b>Work item code:</b>	
<b>Category:</b>	* <input type="text" value="C (Functional modification of feature)"/>
<b>Reason for change:</b>	* From the SAA pilot: numberMatched can be 'unknown', so in case if the actual number of matched features is smaller than the 'count' parameter, or the count parameter is not set, what should the value of 'numberReturned' be? Shouldn't it be possible to set this attribute to 'unknown'?
<b>Summary of change:</b>	* Change the type of numberReturned from xsd:nonNegativeInteger to wfs:nonNegativeIntegerOrUnknown and update specification text accordingly.
<b>Consequences if not approved:</b>	WFS implementation that stream results will not be able to report a valid response document.
<b>Clauses affected:</b>	* 7.7.4.2, 7.7.4.3
<b>Additional Documents affected:</b>
