Title:	*Correct requirements classes and dependencies
Source:	*CSIRO
Work item code:	
Category:	* D (Editorial modification)
<hr/>	
Reason for change:	* The structure of GMLCOV requirements are inconsistent with OGC Policy. * the set of requirements included in each class is not explicit * dependencies are associated with a requirement whereas they should be between requirements-classes
Summary of change:	* (i) for the single requirements/coverage class implied by the specification URIs, the class should be clearly identified and its membership enumerated (ii) Requirement 2 shows a dependency (actually 2?) on clauses from SWE Common. This dependency should be moved up to the requirements class. Furthermore, the dependency should be on requirements classes as identified by URI in the SWE Common specification, and not on clauses from the SWE Common document.
Consequences if not approved:	Inconsistency with OGC Policy, undermining dependency tracking between OGC standards.
