Title:	* WFS: Clarify in the specification if additional parameter domains and constraint
Source:	*pvretano@cubewerx.com
Work item code:	
Category:	* D (Editorial modification)
<hr/>	
Reason for change:	* Clause 8.3.5 defines parameter domains and constraints that can appear in the Capabilities document of a WFS BUT the specification does not clarify whether additional parameter domain and constraint (possibly vendor specific) can appear in the capabilities document.

Summary of change: ⓘ	* Add a sentence to clause 8.3.5 that allows vendors to include addition ows:Parameter and ows:Constrain element that client can ignore if they don't recognize them. I think OWS common may say something along those lines -- in which case clause 8.3.5 should reference the relevant OWS clause.
Consequences if not approved: ⓘ
