<b>Title:</b>	* <input type="text" value="Support Keyword URI in Capabilities"/>
<b>Source:</b>	*Frederic Houbie
<b>Work item code:</b>	
<b>Category:</b>	* <input type="text" value="B (Addition of feature)"/>
<hr/>	
<b>Reason for change:</b>	* Trying to add semantic annotation to XML Capabilities, it is not possible to represent the URI of keywords
<b>Summary of change:</b>	* OWS Common currently allows specification of keywords using the following structure <pre>&lt;Keywords&gt;   &lt;Keyword xml:lang="fr-be"&gt;kw1&lt;/Keyword&gt;   &lt;Keyword&gt;kw2&lt;/Keyword&gt;   &lt;Keyword&gt;kw3&lt;/Keyword&gt;</pre>

	<pre>       &lt;Keyword&gt;kw4&lt;/Keyword&gt; &lt;type codeSpace="http://www.eionet.europa.eu/gemet"&gt;GEMET Thesaurus&lt;/type&gt;  &lt;/Keywords&gt; Unfortunately, it does not allow representation of semantic information like the URI of the keyword. Workaround is using the keyword element content for that but it is semantically wrong. An update to the schema adding an optional attribute to ows:LanguageStringType would solve the problem &lt;attribute name="codeSpace"             type="anyURI"             use="optional" /&gt;  &lt;Keywords&gt;   &lt;Keyword xml:lang="fr-be" codeSpace="http://www.eionet.europa.eu/gemet/kw1"&gt;kw1&lt;/Keyword&gt;   &lt;Keyword&gt;kw2&lt;/Keyword&gt;   &lt;Keyword&gt;kw3&lt;/Keyword&gt;   &lt;Keyword&gt;kw4&lt;/Keyword&gt;  &lt;type codeSpace="http://www.eionet.europa.eu/gemet"&gt;GEMET Thesaurus&lt;/type&gt;  &lt;/Keywords&gt; </pre>
<b>Consequences if not approved:</b>	Not possible to represent the URI of keywords so semantic operations are more difficult on such metadata
