Enter the CR number here: [   ]
Enter the Revsion Number that you are revising here: [   ]

Title:⊙	* [WCS SWG] Subset in KVP requests allows to specify crs, but POST requests are
Source:⊙	*Page 3 of the standard document
Work item code:⊙	
Category:⊙	* C (Functional modification of feature)

Reason for change:⊙	* The KVP request style allows to specify trimming or slicing using the following syntax: dimension [, crs] (intervalOrPoint) However the equivalent trimming and slicing constructs in POST do not support the notion of a CRS. Adding to the confusing, there is going to be a separate extension for CRS handling.
Summary of change:⊙	* Have the CRS be handled the same way in both KVP and POST requests.
Consequences if not approved:⊙	

Clauses affected:⊙	* 6.4
Additional Documents affected:⊙
