<b>Title:</b>	* [SLDSE 1.2 SWG] Support non GML 3.1 features in sld:InlineFeature
<b>Source:</b>	*OWS-9 Aviation thread
<b>Work item code:</b>	
<b>Category:</b>	* C (Functional modification of feature)
<hr/>	
<b>Reason for change:</b>	* The current definition of InlineFeature <a href="http://schemas.opengis.net/sld/1.1.0/StyledLayerDescriptor.xsd">http://schemas.opengis.net/sld/1.1.0/StyledLayerDescriptor.xsd</a> limits its use to GML 3.1 feature collections, while we also want to include AIXM 5.1 features, which is based on GML 3.2.
<b>Summary of change:</b>	* Remove the hard dependency on GML 3.1. This can be done by using xsd:any which enables the inclusion of any feature type, even if they are not GML at all.
<b>Consequences if not approved:</b>	The SLD InlineFeature element will simply not be usable for anything other than GML 3.1.
<hr/>	
<b>Clauses affected:</b>	* Section 11.3 contains an excerpt of the schema definition of InlineFeature.
