Title: ⓘ	* [EO PMOS SWG] Add optional elements referring to products instead of images
Source: ⓘ	*ESA/GIM/Terradue
Work item code: ⓘ	
Category: ⓘ	* B (Addition of feature)
Reason for change: ⓘ	* A number of elements currently have "image" in their name which could give the false impression that the standard is only applicable to optical products.
Summary of change: ⓘ	* Equivalent elements with element names referring to "product" are introduced as new optional elements with same type, cardinality and description as the original elements. These elements are:

	productQualityDegradation productQualityDegradationQuotationMode productQualityDegradationTag productQualityReportURL productQualityStatus The existing elements with image in their name are declared as deprecated but not removed in order to preserve backwards compatibility. In addition, the description of the filemane elements for products, masks and browses in the earthObservation result class is changed to refer to products instead of images
Consequences if not approved: ?	
Clauses affected: ?	* 8.1.1 and 8.1.4
Additional Documents affected: ?	None
