Title: 	* Addition of optional elements creationDate and modificationDate
Source: 	*ESA/GIM
Work item code: 	
Category: 	* B (Addition of feature)

Reason for change: 	* The document OGC10-157r3 describes within the EarthObservationMetaData class an element creationDate with as description: metadata field for the creation/modification date of the catalogue entry. This element is however not present in the corresponding schema eop.xsd. In addition it is often useful to make the distinction between the date of creation and the date of modification of a metadata record.
Summary of change: 	* In the OGC10-157 document text, revise the description of the creationDate element and add the modificationDate element with following descriptions: creationDate : Creation date for the metadata item. When retrieved from a metadata catalogue, the creationDate is the date when the metadata item was ingested for the first time (i.e. inserted) in the catalogue. modificationDate: Date of the last modification to the metadata item. When retrieved from a metadata catalogue, the modificationDate is the date when the metadata item was last modified (i.e. updated) in the catalogue. The eop.xsd needs to be updated accordingly.
Consequences if not approved: 	Schema eop.xsd not in line with document text. Not possible to make a distinction between the creation and last modification of the metadata item.
Clauses affected: 	* 8.1.1 (UML and corresponding Table 5) and schema eop.xsd
