Title:	* [WMS1.4 SWG] DescribeLayerResponse should report feature type names by lay
Source:	*interactive instruments GmbH
Work item code:	
Category:	* C (Functional modification of feature)
<hr/>	
Reason for change:	* 05-078r4 in section 8.3 reads: "For each named layer, the description should indicate the WFS/WCS (by a URL prefix) and the feature/coverage types." Though the DescribeLayer request permits to specify a list of layers and though the DescribeLayerResponse provides for a "LayerDescription" element, which can occur more than once in the response, there is no element available in the "LayerDescription" which could carry the layer name.
Summary of change:	* Add a mandatory element "LayerName" to "LayerDescriptionType".
Consequences if not approved:	It will not be possible to represent the response data as requested in 05-078r4 section 8.3.
<hr/>	
Clauses affected:	* 8.3, 8.3.1
Additional Documents affected:	SLD Schema files

Supporting Documentation: 	
Comments: 	It was still o.k. in SLD 1.0.0.
Status: 	Assigned 
Assigned To: 	WMS 1.4 SWG 
Disposition: 	Referred and Posted
