

Figures

Figure 2-1: CDB Earth Slice Representation (OK)

Figure 2-2: Variation of Longitudinal Dimensions versus Latitude (some text needs to be larger)

Figure 2-3: Tile-LOD Hierarchy (text needs to be larger)

Figure 2-4: Earth Slice Example (Five Levels-of-Detail)(some text needs to be larger)

Figure 2-5: Extract from Light Naming Hierarchy (need better graphic quality)

Figure 2-6: Seabed Composite Material (OK)

Figure 2-7: Oil Tank Composite Materials (OK)

Figure 2-8: Thermal Simulation of Oil Tank Composite Materials (OK)

Figure 2-9: Flow of Material Attribution Data (need better quality graphic)

Figure 3-1: UML Diagram of CDB Version Concept (some text a little hard to read due to color choice)

Figure 3-2: A Valid Chain of CDB Versions (some text a little hard to read due to color choice)

Figure 3-3: UML Diagram of CDB Extension Concept (perhaps need better quality graphic)

Figure 3-4: Adding content to the CDB (perhaps need better quality graphic)

Figure 3-5: Modifying Content of the CDB (perhaps need better quality graphic)

Figure 3-6: Deleting Content from the CDB (perhaps need better quality graphic)

Figure 3-7: UML Diagram of CDB Configuration Concept (black text on blue hard to read)

Figure 3-8: Allocation of CDB Geocells with Increasing Latitude (OK)

Figure 5-1: Center Grid Data Elements (OK)

Figure 5-2: Corner Grid Data Elements (OK)

Figure 5-3: Center Data Elements as a Function of LODs (OK)

Figure 5-4: Corner Data Elements as a Function of LODs (OK)

Figure 5-5: Example of Digital Elevation Model (DEM) (OK)

Figure 5-6: DEM Depicted as a Grid of Elevations at Regular Sample Points (OK)

Figure 5-7: CDB Mesh Types (OK)

Figure 5-8: Primary Terrain Elevation Component (Some text may need to be larger)

Figure 5-9: Modeling of Wells, Overhanging Cliffs and Tunnels (Some text may need to be larger)

Figure 5-10: Encoding of Lat/Long Offsets (Text may need to be improved)

Figure 5-11: Grid Element Coverage within a CDB Tile (OK)

Figure 5-12: Storage Tank Point-Feature (OK)

Figure 5-13: Road Lineal Feature (OK)

Figure 5-14: LOD Structure of Raster Datasets (OK)

Figure 5-15: Generation of LODs for the MinMaxElevation Dataset (1D) (OK)

Figure 5-16: Generation of LODs for the MinMaxElevation Dataset (2D) (Text at bottom could be more crisp/larger)

Figure 5-17: Generation of LODs for the MinMaxElevation Dataset (1D) – Special Case (Text at bottom could be more crisp/larger)

Figure 5-18: Availability of LODs for Elevation and MinMaxElevation Datasets (OK)

Figure 5-19: Missing MinMaxElevation Datasets (OK)

Figure 5-20: Primary Terrain Elevation and Subordinate Bathymetry Components (OK)

Figure 5-21: Derived Earth Elevation Values (OK)

Figure 5-22: Example of Primary Terrain Elevation and Bathymetry Components (OK)

Figure 5-23: Terrain Elevation, Bathymetry and Tide Components (Text could be a bit more crisp)

Figure 5-24: Derived Earth Elevation, Water Elevation and Surface Elevation Values (Text could be a bit more crisp)

Figure 5-25: Projection of Terrain Imagery Dataset onto Terrain Elevation Dataset (OK)

Figure 5-26: Image Classification Example (OK)

Figure 5-27: Example of a Raster Material Dataset (OK)

Figure 5-28: Instance-level Attribution Schema (OK)

Figure 5-29: Class-level Attribution Schema (Perhaps larger text)

Figure 5-30: Relation between Shapes and Attributes (OK)

Figure 5-31: RTAI Typical Usage Histogram (OK)

Figure 5-32: Example of a Topological Network (OK)

Figure 5-33: Example of International Boundaries (Need to integrate arrows into graphic)

Figure 5-34: Example of City Locations (Already upgraded graphic)
