

3D Geospatial M&S Summit Follow On 13 April 2017

Draft Agenda As of: 30 March 2017

Background and Goal of meeting:

As part of the 3D Geospatial M&S Summit convened in Orlando last September, a range of ideas were voiced on possible ways forward for standards and interoperability necessary to ease interoperability challenges across the M&S community, and to facilitate the advancement of a global model of the world. Several concrete actions were identified along with a range of ideas worthy of further exploration.

The M&S Follow-on Summit is being convened as an informal meeting to leverage the dialog and ideas of last year's summit, and enable us to synchronize on the current state of environmental interoperability efforts among interested stakeholders. Our desire is to begin development of a roadmap for advancing interoperability among the various stakeholders.
