- Welcome
- Keynote: Yana Gevorgyan, Secretariat Director, GEO
- Quorum confirmation
- TC Motions
  - Simple Features – Part 1: John Herring
  - GeoPackage Corrigendum and Tiled Gridded Coverage Data Extension: Jeff Yutzler
  - OGA API – Common – Part 1: Core: Chuck Heazel
  - CoverageJSON Community Standard Work Item: Chris Little
  - Best Practice for Earth Observation Application Package: Ryan Ahola
- Upcoming TC Meetings
- TC Chair announcements and motions
- Working Group reports with motions: 3 to Z
- “Important Things” discussion

- Yana Gevorgyan, Secretariat Director, GEO
- Expert on international relations
- Formerly GEO Program Manager and International Relations Specialist at NOAA
- Received NOAA's Silver Sherman award for her outstanding leadership

OCTOBER 2021

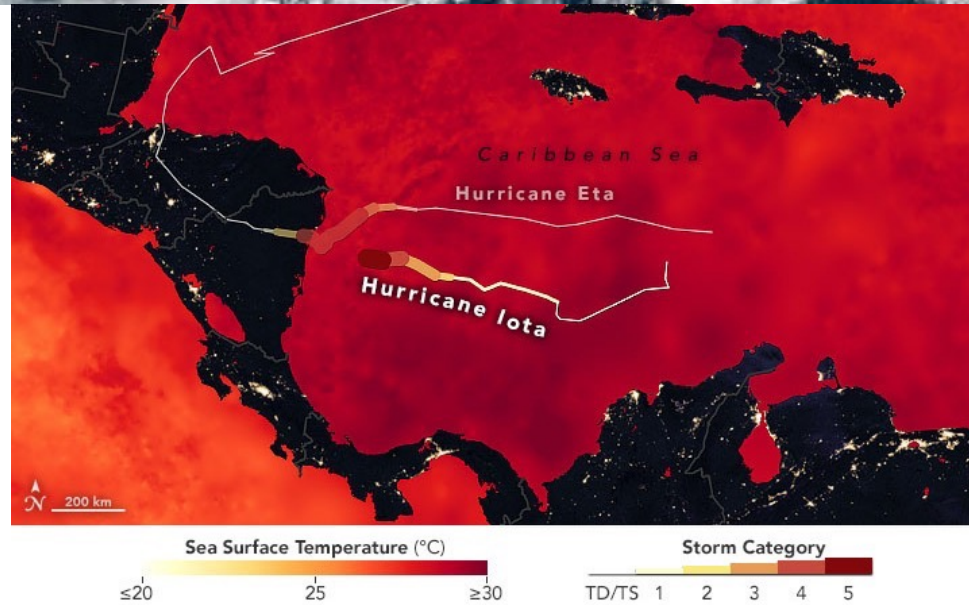

# OGC Member meeting

Yana Gevorgyan  
Director of Secretariat

Source: NASA Earth  
Observatory

# Hurricane ETA 2020

# Results, Impact & Value

## RESULTS

During Hurricanes Eta and Iota the Honduran state power company ENEE used the GEOGLOWS ECMWF Streamflow Forecast Services to direct discharge of 200 million m<sup>3</sup> of water in the El Cajón reservoir before Iota's arrival, creating flood storage while avoiding loss of power generation or worse.

## IMPACT

The Sula Valley generates about 65% of gross domestic product (GDP), representing over 50% of Honduras exports. Direct and indirect impacts on roughly 2 million people (30% of the national population) residing in rural and urban areas within the valley would have been incalculable.

## VALUE

The economic losses from Eta and Iota in 2020, when compared to those from Hurricane Mitch in 1998 that had a similar impact magnitude, were about 30% less thanks because of the flood control provided by El Cajón

## Report

Joan Maso (UAB-CREAF), Gobe Hobona (OGC)

The 120<sup>th</sup> OGC Member Meeting

20 September 2021

The world's leading and comprehensive community of experts making location information:

Findable

Accessible

Interoperable

Reusable

Should OGC require that OGC standards provide conceptual models represented in UML, encoded in XMI and integrated into a consolidated model?

- May 2021 OGC API Code Sprint Summary Engineering Report - Gobe Hobona (OGC)
- July 2021 OGC API Code Sprint Summary Engineering Report - Joana Simoes (OGC)
- Schemas for OpenAPI that are not necessarily for OpenAPI - Joan Maso (UAB CREAM)
- Summary of Conceptual Modeling Sub-Group Discussion - Sam Meek (Helyx SIS)
- Consistent versioning approach on OpenAPI definition documents - Gobe Hobona (OGC)
- Testbed-17 Preliminary Findings on OpenAPI Code Generators - Samantha Lavender (Pixalytics), Aleksandar Balaban (m-click.aero), Josh Lieberman (OGC)

- Discussion topics

- Outcomes of recent OGC API Code Sprints
- The need for a consistent versioning approach on OpenAPI definition documents during development of OGC API standards
- The need for JSON schemas for responses independent from OpenAPI definition documents during development of OGC API standards
- Testbed-17 has been experimenting with code generators ingest OpenAPI definition documents
- There's a need for a shared repository of UML models used in OGC standards

- Coordination (ongoing and planned)

- OGC API SWGs

- Upcoming deliverables

- Review of assigned Testbed-17 Engineering Reports

- Future meetings

- December 2021 OGC Member Meeting
- Conceptual modeling subgroup telecons

- Facilitating OGC API cross-SWG discussions
- The Conceptual Modeling Sub-group of the Architecture DWG has held its first meeting

- The group will focus on model:
  - Correctness (according to the OMG standard in the case of UML)
  - Consistency (in terms of its representation)
  - FAIRness (findable, accessible, interoperable and reusable)
  - Value (what *work* does it do?)
- The outcomes of the group were:
  - Create a mailing list (done) – please sign up if you are interested.
  - Create a GitHub repository (done).
  - Create a regular meeting slot
  - Assist in the creation of a centralized repository for modeling work.

- Lets reserve the openapi folder for the things that are openapi specific:
  - a.k.a OpenAPI domain documents (with openapi schemas) and OpenAPI examples.
- .../schema
- .../schema/examples
- .../openapi
- .../openapi/examples

Discuss at  
OGC API – Common GitHub repo  
Issue #199

- The Architecture DWG recommends that the OGC Technical Committee approve release of OGC 21-042 “May 2021 OGC API Code Sprint Summary Engineering Report” as an OGC Public Engineering Report.
  - There was no objection to unanimous consent
  - Abstract: The subject of this Engineering Report (ER) is a code sprint that was held from 26 to 28 May 2021 to advance the development of the OGC API - Maps draft standard, OGC API - Tiles draft standard, and the OGC API – Styles draft standard. An Application Programming Interface (API) is a standard set of documented and supported functions and procedures that expose the capabilities or data of an operating system, application or service to other applications (adapted from ISO/IEC TR 13066-2:2016). The code sprint was hosted online. The code sprint was sponsored by Ordnance Survey (OS) and Natural Resources Canada (NRCan).

- The Architecture DWG recommends that the OGC Technical Committee approve release of OGC 21-055 “July 2021 OGC API Code Sprint Summary Engineering Report” as an OGC Public Engineering Report.
  - There was no objection to unanimous consent
- Abstract: The subject of this Engineering Report (ER) is a virtual code sprint that was held from July 21st to July 23rd, 2021 to advance the development of the OGC API - Processes draft standard, OGC API - Records draft standard, and the OGC API – Coverages draft standard. An Application Programming Interface (API) is a standard set of documented and supported functions and procedures that expose the capabilities or data of an operating system, application or service to other applications (adapted from ISO/IEC TR 13066-2:2016).

# The most important thing for this WG is...

12 : 45 : 87  
FEB - 05 - 3254  
167 78 804

OGC

An Executable Test Suite for OGC API – Common will be built as soon as the candidate standard is approved by the OGC Membership. Will this be an issue?

- Planning for How to certify Compliance to OGC API – Common
  - Gobe Hobona
- TEAM Engine Updates
  - Dirk Stenger
- An Update from the Testbed-17 CITE activity
  - Luis Bermudez
- Modular APIs and Compliance
  - Chuck Heazel
- Any other business

- Discussion topics

- Whether to include the OGC API – Common tests inside other OGC API ETS or to implement them as their own or both
- Whether the OGC API – Common ETS should expect a landing page and how to handle absence of a landing page
- CDB 1.0 ETS now on the Production Validator
- Potential implications of the Conformance Modules on Compliance Testing (following on from Open OAB discussion)
- What is the best general purpose OpenAPI validation library to use?

- Coordination (ongoing and planned)

- Features API SWG
- EDR API SWG
- Testbed-17 CITE thread

- Upcoming deliverables

- Production version of ETS of **OGC API – Features – Part 2**
- Beta version ETS of **OGC API – Processes – Part 1**
- Beta version ETS of **OGC API – EDR**

- Future meetings

- Next Member Meeting

- TEAM Engine development
- Executable Test Suite development
  - We need more volunteers to serve as Test Leads
  - We need more sponsors to support Test Suite development in Testbed-18

# Motion to approve the OGC API – Features – Part 2: CRS by Reference Executable Test Suite as Official

- The CITE Subcommittee recommends that the Technical Committee approves the Executable Test Suite (ETS) of version 1.0 of the OGC API – Features – Part 2: CRS by Reference Standard as an official OGC Compliance Test Package.
- At the time of this motion, there are 3 early implementors that have passed the compliance test. 2 are already certified.
  - There was no objection to unanimous consent

NOTE: OGC Compliance Policy Section 5 **“It is required to have at least three implementations that pass a conformance class for a conformance class to be released as official.** However, if a test has been in beta for more than 6 months and one or two implementations have passed the test, the CITE SC can consider a motion related to releasing the test as official with an exception about requiring three minimum implementations. When the TC approves a Compliance Test Package. It is published at the OGC Web-based Testing Facility. Organizations may then certify their products using the new Compliance Test Package”

# ISG DWG Closing Plenary Report

Lance Marrou, Leidos

The 120<sup>th</sup> OGC Member Meeting

20 September 2021

The world's leading and comprehensive community of experts making location information:

Findable

Accessible

Interoperable

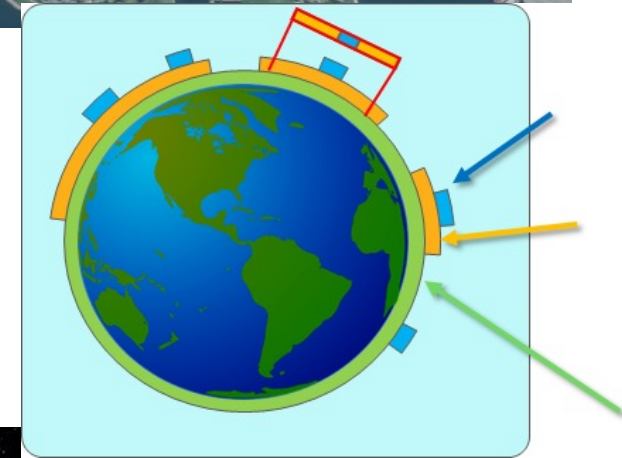

Reusable

- Introductions and welcome – Lance Marrou
- ISG Sprint Year 2 ER – Leonard Daly, Rollin Phillips
- OWT Update – Ron Moore
- SISO SpaceFOM – Björn Möller

- Leonard provided a summary and presentation of the ISG Sprint Year 2 Engineering Report. The report as a PDF is available in Pending documents and the data (videos) are hosted in the Sprint folder (observer agreement required).
- Ron presented the current status and some examples of the work under the One World Terrain contract (U.S. Army). This has a lot of overlap and synergy of OGC standards.
- Bjorn Moller presented work primarily from SISO on the SpaceFOM (Federated Object Model) with relevant ties to geospatial and OGC standards.

- The ISG DWG recommends that the OGC Technical Committee approve release of [OGC 21-058] “ISG Year 2 Sprint” as an OGC Engineering Report.
  - There was no objection to unanimous consent
- The OGC Interoperable Simulation and Gaming Year 2 Sprint advanced the use of relevant OGC and Khronos Group [<https://www.khronos.org/>] standards in the modeling, simulation, and training communities through capability development, compatibility testing, and gap analysis. Of particular interest was the use of glTF models, game engines, and 3rd-party mobile device libraries for the display and interaction with OGC data and APIs.
- Also approved by CDB SWG

# OGC Naming Authority SC

Gobe Hobona (OGC), Erik Stubkjær (AAU)

Should the OGC-NA offer a service that resolves compound CRS as shown below?

`{crs1}+{crs2} == http://www.opengis.net/def/crs-compound?1=crs1&2=crs2`

- Motion to approve revision of OGC-NA Name type specification - specification elements - Gobe Hobona (OGC)
- Motion to approve revision of OGC Naming Authority - procedures - Gobe Hobona (OGC)
- Proposal to Register the International Astronomical Union (IAU) as an authority - Gobe Hobona (OGC)
- Proposal to Register DGIWG Profile TIFF/GeoTIFF Tags in the OGC Definitions Server - Emmanuel Devys (IGN)
- Proposal to Register <http://www.opengis.net/def/crs/OGC/0/CRS84> as an alias of <http://www.opengis.net/def/crs/OGC/1.3/CRS84> - Clemens Portele (interactive instruments)
- A CURIE approach to Simplification of URIs - Rob Atkinson / Gobe Hobona (OGC)
- OGC Definitions Server Briefing - Rob Atkinson (OGC)

## • Discussion topics

- Revisions of OGC-NA Procedures policy and OGC-NA policy on Specification Element policy were approved.
- Registration of the International Astronomical Union (IAU) as an Authority, and relation to future Planetary DWG. Registration was approved.
- Registration of DGIWG TIFF/GeoTIFF Tags in the OGC Definitions Server, and related private key governance issues. Registration was approved.
- The proposal for an alias for CRS84 and whether the scope should cover all object types, not just CRS. Further investigation is needed.
- The use of Compact URIs, also known as CURIEs. A proposal to simplify OGC URIs through CURIEs was approved (Issue#92).

## • Coordination (ongoing and planned)

- Several DWGs and SWGs

## • Upcoming deliverables

- OGC-NA Name type specification - specification elements
- OGC Naming Authority - procedures

## • Future meetings

- Next Member Meeting

- Revision of OGC Name Type Specification - definitions - part 1 – basic name
- Registration of additional resources in the Definitions Server
- Updates to the Definitions Server infrastructure

- The OGC Naming Authority Sub-Committee recommends that the OGC Technical Committee approves the publication of OGC 10-103r1 “OGC-NA Name type specification - specification elements v2.1” as a revision of OGC Policy.
- Result: NOTUC
- Abstract: This document specifies a rule for constructing OGC names that may be used for identifying specification elements defined in the OGC Specification Model – Modular Specification.
- This revision adds a section that describes each segment along the path of a specification element URI as a resource.

- The OGC Naming Authority Sub-Committee recommends that the OGC Technical Committee approves the publication of OGC 09-046r6 “OGC Naming Authority - procedures” as a revision of OGC Policy.
- Result: NOTUC
- Abstract: In the terminology defined in ISO 19135, OGC-NA is the Control Body for the register of OGC Names. This document describes the framework of documents, registers and other resources required for OGC-NA to execute that role.
- This revision adds explanations of status flags.

- OGC-NA Chair to register the International Astronomical Union (IAU) as an authority in the OGC Definitions Server. After registration, OGC staff will engage with IAU representatives, the CRS DWG, and the future Planetary DWG to facilitate the future registration of planetary coordinate reference systems.
- If the Planetary DWG does get established, it will become a key advisor to the OGC-NA on registration of planetary CRS's.

**OGC**<sup>®</sup>

Significant progress has been made on the Deformation Model Functional Model and the Gridded Geodetic data eXchange Format.

- Now is the time to review these Project Team documents before they move over to the SWG.
- Now is the time to implement prototypes to prove out the proposed model and exchange format.

The Coordinate Reference Systems meeting will again be a joint DWG/SWG. This quarter's meeting will cover:

Ongoing Domain Working Group Project Team Reports:

- Deformation model functional model
- GGXF : Gridded Geodetic data eXchange Format

Coordinate Reference Systems in a new ISO work item - ISO15143-4: Earth-moving machinery and mobile road construction machinery – Worksite data exchange

## • Discussion topics

- Update on Deformation Model Functional Model and
- Update on the Gridded Geodetic data eXchange Format
- Presentation on Coordinate Reference Systems in a new ISO work item - ISO15143-4: Earth-moving machinery and mobile road construction machinery – Worksite data exchange
- Other Business –CRS adjustments in France, dynamic datums, and CRS in BIM

## • Upcoming deliverables

- Project team documents are being reviewed and finalized for the Deformation Model Functional Model and the Gridded Geodetic data eXchange Format
- Developer prototyping of NetCDF and GeoTiff as format vehicles for the Gridded Geodetic data eXchange Format is underway

## • Coordination (ongoing and planned)

- Coordinating with the Naming Authority regarding issues raised over the past quarter.
- Coordination as need to assist the ISO15143-4 project team with understanding of 19111/OGC Topic 2

## • Future meetings

- Continue every other week meetings for the DWG Project teams.

OGC

One thing that is most important for this WG is to raise wider awareness of DGGS and OGC APIs for DGGS throughout the wider geospatial community.

- Introduction & Logistics
  - Chair (5 min)
- Discussion: Brief background and status update on OGC API DGGS
  - Matthew Purss (10 min)
- Discussion: OGC API DGGS WKT Geometry Encoding
  - Robert Gibb (45 min)
- Discussion: OGC API DGGS Swagger Doc update and refinement for use in October Code Sprint
  - Matthew Purss (20 min)

- Presentation: The Role of DGGS Beyond SDI
  - Robert Gibb (10 min)

## • Discussion topics

- Review of current status of OGC API - DGGs
- OGC API DGGs WKT encodings
- OGC API DGGs implementation and the OGC API Code Sprint in October.

## • Upcoming deliverables

- Nil

## • Coordination (ongoing and planned)

- Engagement with all relevant OGC API SWGs to help determine key patterns and structures for DGGs APIs to assist the DGGs SWG in its task of drafting the OGC API DGGs implementation standards.
- Engagement with the OGC Innovation Program to review outcomes from planned OGC DGGs API code sprints to be conducted in 2021.

## • Future meetings

- Next Virtual Meeting – OGC September Members Meeting.
-

- Review of DGGS API implementations and their alignment with existing OGC API Standards to define the appropriate scope of a OGC API DGGS Specification.
- Ongoing work to develop and implement the OGC DGGS Registry will continue into 2021, in close coordination with the OGC API DGGS activities.

Accessible

Interoperable

Reusable

# The most important thing for this WG is...

12 : 45 : 87  
FEB - 05 - 3254  
167 78 804

OGC

The OGC Disasters Pilot is extremely important

The evolution of higher performance edge computing capabilities  
are resulting in a sea change

Some of the other things that are most important for this WG are  
the collaborations with other organizations and standards bodies

- Josh Lieberman
  - A short update on the OGC Disasters Pilot
- 周老師 Tien-Yin (Jimmy) Chou
  - AI with edge computing for smart monitoring
- Don Sullivan (for Amy Duffy)
  - Background on the Western Regional Partnership - Amy will be in person in December !

# Energy and Utilities Domain Working

## Group - Closing Plenary Report

Jessica Webster, NRCan

The 120<sup>th</sup> OGC Member Meeting

20 September 2021

# The most important thing for this WG is...

12 : 45 : 87  
FEB - 05 - 3254  
167 78 804

OGC

- Maintaining engagement and momentum from the Building Energy Mapping and Analytics Concept Development Study (BEMA-CDS) by identifying interoperability pilots to demonstrate and build an energy Spatial Data Infrastructure (eSDI)

*Notional energy Spatial Data Infrastructure (eSDI) architecture*

## Agenda

### 1. Welcome/Introductions

### 2. Lightning Talks

Dr. Steve Liang, SensorUp/University of Calgary - Sensor Web Enablement

Sylvain Vallières, Natural Resources Canada - National Building Layer

Sanam Dabirian, Concordia University - HTAP and Data Modelling

Josh Lieberman, OGC - Interoperability Program, Integrated Digital Built Environment

### 3. Discussion: Potential for interoperability experiments

### 4. Priorities for 2022

### 5. Close

*“This session included discussions on next steps for building energy mapping and analysis, the potential for interoperability experiments to address particular challenges in this area, lightning talks from other relevant DWG/SWGs, and planning for an Energy Summit in 2022.”*

## • Discussion topics

- eSDI notional architecture as key output of BEMA-CDS study
- Interoperability experiments e.g. Integrated Digital Built Environment Pilot
- Related standards of which the DWG should be aware

## • Upcoming deliverables

- Blog to promote the BEMA-CDS, via OGC website.

## • Coordination (ongoing and planned)

- E&U DWG members invited to review best practice methane emissions data exchange based on SensorThings API when document posted to pending
- Watching brief on BuildingSMART Integrated Digital Built Environment Interoperability Pilot

## • Future meetings

- E&U DWG meeting to be held at December Member meeting
- Planning for Energy Summit in 2022

- **Maintain momentum from BEMA-CDS** in DWG through lightning talks on initiatives already working on the research opportunities + next steps identified in the study
- Main topics of discussion, components of potential interoperability experiments:
  - Existing standards – OGC (e.g. CityGML, SensorThings API etc...) ISO/IEC JTC 1/SC 25/WG 5, I-IREC, ASHRAE 100
  - Existing data and making it interoperable
    - e.g. Is it possible to share data from Retscreen, EnerGuide and Portfolio Manager to National Building Layer and vice versa?*
  - A handful of potential collaborative opportunities were identified
- **Blog** on BEMA-CDS to be posted to OGC website
  - While not an E&U DWG product, the anticipated *OGC White Paper on the Standards Landscape for Building Data*, completed for the National Building Layer (NBL) relates closely to the E&U DWG and its activities

# National Building Layer – Core Attributes

## Core Attributes

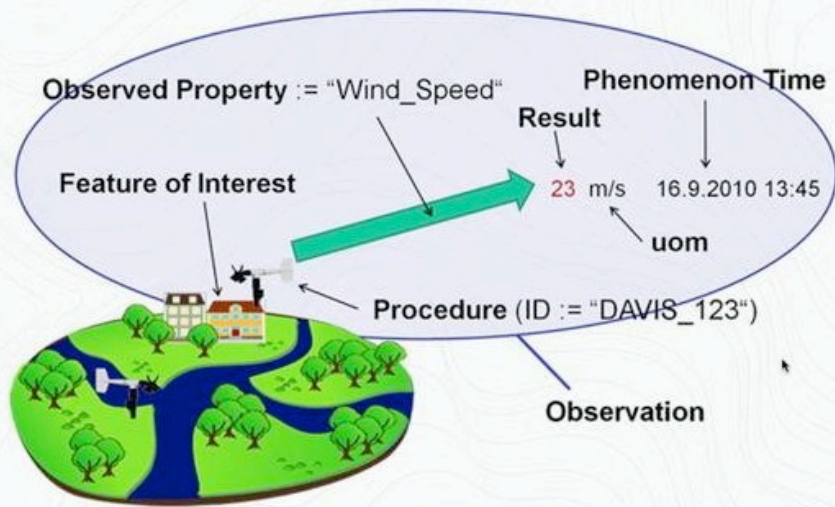

The diagram shows a multi-story brick building with a ground floor featuring a striped awning. Eight blue callout boxes are connected to the building by thin lines, pointing to various parts of the structure: 'Building Condition' points to the roof; 'Number of Stories' points to the upper floors; 'Building Use' points to the ground floor; 'Year Built' points to the base of the building; 'Accessibility Compliance' points to the ground level; 'Building Name' points to the front facade; 'Number of Units' points to the windows on the upper floors; and 'Building Height' points to the top of the building.

Building Core	
NBL ID	
Building Use Primary ID	
Building Use Secondary ID	
Number of Occupants	
Number of Units	
Unit Type ID	
Ownership Type ID	
Ownership Type Qualifier ID	
Centroid Latitude	
Centroid Longitude	
Number of Storeys	
Building Height (m)	
Floor Area (m <sup>2</sup> )	
Year Built	
Accessibility Compliance ID	
Building Condition	
Building Name	
NBL Date	
Data Provider Date	
Data Provider Name

## Information Model – OGC/ISO 19156 O&M

OGC/ISO 19156 Observations and Measurements

## OGC PipelineML as the Feature-of-Interest

Slides from: Dr. Steve Liang, CEO SensorUp

- Promote the blog on the Building Energy Mapping and Analytics Concept Development Study and the BEMA-CDS study itself
- Share with DWG members
  - *OGC White Paper on the Standards Landscape for Building Data*
  - CityGML 3.0 standard
  - Best practice methane emissions data exchange based on SensorThings API

# The most important thing for this WG is...

12 : 45 : 87  
FEB - 05 - 3254  
167 78 804

OGC

- Need common data models/formats to share geospatial training datasets
- Potential value of identifying construction sites and classifying construction stages using satellite images and machine learning models.

- Sept 13th, 6:30 AM - 8:00 AM (EDT)

6:30 - 6:35	Introduction
6:35 - 6:55	Overview of HDF5 format; Aleksandar Jelenak (The HDF Group)
6:55 - 7:15	NetCDF-LD; Jonathan Yu (CSIRO)
7:15 - 7:35	MODERNIZING CONSTRUCTION INDICATORS THROUGH MACHINE LEARNING AND SATELLITE IMAGERY; Deirdre Bishop, Stephanie Studds and Aidan Smith (CENSUS/GEO FED)
7:35 - 7:55	Point Cloud Annotation System by using HDF5; Wijae Cho, Kyoungsook Kim (AIST)
7:55 - 8:00	Closing

## • Discussion topics

- Common data formats for sharing training datasets: HDF5, NetCDF-LD
- Census Construction Indicators - Satellite and AI
  - New Residential Construction (NRC)
  - New Residential Sales (NRS)
  - Construction Spending (VIP)
- Point Cloud Annotation System
  - Stanford datasets, ScanNet, KITTI, ShapeNet

## • Upcoming deliverables

- GeoAI White Paper

## • Coordination (ongoing and planned)

- ISO/IEC JTC1 SC42
- Data Quality DWG
- GeoPose SWG
- Moving Features SWG
- (SampleML – AI/ML SWG)

## • Future meetings

- Next TC meeting

## GeoSemantics DWG

- Sergio Taleisnik (Skymantics): Disaster Pilot JSON-LD ER
- Joseph Abhayaratna (Geoscape Australia): Maintenance for Shapes that are not part of the GeoSPARQL Standard (30 min)

## Spatial Data on the Web interest group

- Linda van den Brink (Geonovum): SDW best practice update: co-editor needed
- Jeremy Tandy (MetOffice): SDWIG discussion on where next to drive impact from geospatial data (30 min)

- Discussion topics

- Disaster Pilot JSON-LD ER Roadmap.
- Storage of spatial semantic artefacts.
- Updating the Spatial Data on the Web Best Practices.

- Upcoming deliverables

- GeoSPARQL 1.1 (via GeoSPARQL SWG).

- Coordination (ongoing and planned)

- GeoSPARQL SWG
- W3C Spatial Data on the Web Interest Group

- Future meetings

- Next OGC MM

# GeoTIFF.SWG

OGC<sup>®</sup>

The most important thing for the Met Ocean DWG is...

OGC

Widespread implementation of OGC API-EDR across a variety of domains

- Brief overview of Meteorology and the Met Ocean Domain WG
- Overview of WMO WIS2.0 plans (Enrico Fucile/Chris Little)
- Overview of SpaceWx activities in Met Services (M Gibbs/C Little)
- Brief review of standards sponsored by the Met Ocean DWG (C Little)
- Brief review of proposed standards, including W3C (C Little)
- Discussion (All)
  - Metadata, controlled vocabularies
  - Collaboration on API chains (Records, Sensors, Processes, etc)

- Discussion topics

- Prioritized developments for API-EDR V1.1
- SpaceWx forecasting
- WMO WIS2.0 initiative

- Upcoming deliverables

- Standardization of CoverageJSON

- Coordination (ongoing and planned)

- EDR API SWG, API-Records, API-Processes, SensorThingsAPI
- CoverageJSON community
- Temporal DWG
- W3C SDWWG
- RDA Data Granularity WG

- Future meetings

- Regular weekly GTM meetings, Thursdays
- December TC, not in California
- 2021 Common Alerting Protocol (CAP) implementation Workshop, OASIS/ITU Rec. X.1303, Webinar, 13-14 October

12 : 45 : 87  
FEB - 05 - 3254  
167 78 894

- OGC Best Practices for using Web Map Services (WMS)
  - with Time-Dependent or Elevation-Dependent Data ([OGC 12-111r1](#))
  - with Ensembles of Forecast Data ([OGC 16-086r3](#))
- OGC/WMO/ICAO Weather/Aviation Model for SWIM/SESAR/NextGen(v2 2013..)
- OGC WCS Application Profile & Extensions
  - OGC MetOcean Application Profile of WCS2.1: Part 0 MetOcean Metadata ([OGC15-045r7](#))
  - OGC MetOcean Application Profile for WCS2.1: Part 1 MetOcean GetCorridor Extension ([OGC15-108r3](#))
  - OGC MetOcean Application Profile for WCS2.1: Part 2 MetOcean GetPolygon Extension ([OGC17-086r3](#))
  - OGC CF-netCDF 3.0 encoding using GML Coverage Application Schema ([OGC14-100r2](#))
  - OGC GML Application Schema – Coverages : GRIB2 Coverage Encoding Profile ([OGC16-060r2](#))
- OGC TimeSeriesML
  - OGC TimeseriesML 1.2 – XML Encoding of the Timeseries Profile of Observations & Measurements ([OGC15-042r5](#))
  - OGC Timeseries Profile of Observations and Measurements ([OGC15-043r3](#))
- OGC Abstract Specification Topic 2: Referencing by coordinates Corrigendum, contributed Calendar examples ([OGC18-005r5](#))
- OGC API-EDR Environmental Data Retrieval ([OGC19-086r4](#)) **Published this week!** (spatio-temporal data retrieval)

- Did you know that there are only about 20 organisations that forecast globally routinely? (and well!)  
~10km resolution
- Less than 100 countries run regional models, with boundary conditions from the global models, resolutions ~1km to ~10km
- Global warning systems: volcanic ash, nuclear & chemical releases, hurricanes, tsunami, locusts, etc
- Modelling and prediction now encompasses: lower/upper atmosphere, oceans, tides, cryospheres, terrestrial, sub-surface, hydrology, ecology, chemistry, pollution, air quality, space weather, other planets, ...
- the Data is BIG, **VERY BIG**

- Publication of OGC API-EDR on Monday 13 Sept 2021
- Perhaps publicize operational 24/7 SpaceWx forecasting?

FEB - 05 - 3254  
167 78 894

OGC

Establish a common vision and scope for describing the portrayal of symbols, and their encoding.

- International Cartographic Association (ICA) presentation “How can we contribute to the work of the OGC Portrayal DWG?” (Previously presented at June Meeting).
- Discussion on Portrayal
- Future meetings:  
Call out for presentations from OGC Community for December 21 and Spring 22 Members Meetings. Portrayal DWG is continuing its presentation series.

- Discussion topics

- Serena Coetzee, University of Pretoria - International Cartographic Association: How can we contribute to the work of the OGC Portrayal DWG?
- Discussion after presentation

- Upcoming deliverables

- none

- Coordination (ongoing and planned)

- Ensure coordination with the API-Styles SWG
- Ensure coordination with Styles and Symbology Encoding SWG

- Future meetings

- Coordinate a December's meeting Portrayal DWG that brings in presentations on portrayal requirements and capabilities from a broad cross section of the OGC and industry.
- One presentation lined up on Portrayal and Accessibility.
- Please get in touch if interested in presenting.
